To Whom It May Concern:

I have been informed that a new broadcast service known as Low Power FM may affect my ability to listen to one of my favorite radio stations: K-Love. K-Love is heard in my area on FM 102.3, 104.3 and 96.9. This is one of the few positive radio stations producing shows targeted to people of my age and moral background. K-Love not only offers excellent program; K-Love helps me to know what services and events local organizations are offering. These services and events are healthy community building activities. If it were not for K-Love, the success of these events would be in jeopardy. P

For the sake of our community in the Dayton Ohio area, please do not allow LPFM to force K-Love and other such radio stations, which are heard over FM translators, off the air.

Sincerely,  
Elizabeth Debrason  
Concerned Listener
